DETAILED ACTION

1. Claims 1-39 are presented for examination.
2. Claims 1-39 are allowed.
3. The following is an examiner's statement of reasons for allowance: None of the prior art of record fairly teaches or suggests all of the claimed limitations especially the limitation of seamless transition between polling and contention modes for contention mode subgroups of users that when a collision occurs between user signals within the subgroup, the subgroup is split into smaller subgroups each smaller subgroup also utilizing contention mode. Ramakrishnan et al, cited in the previous office action, taught to split subgroups into smaller subgroups when collisions occur, but fails to teach or suggest all of the split smaller subgroups to utilize contention mode. None of the other prior art of record teaches or suggests splitting subgroups of users into small subgroups when collision occurs. Hence, the invention is novel over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
